SUMMARY

I am full stack web developer. I have experience developing restful API in Express Js and making usage of API in PHP. I have strong grip over Advance Javascript ES6, Socket IO and Express Js.

For backend, I can work in NodeJs and PHP. I have experience with Relational Database Management Systems such as MySql and PostgreSQL, and Non-Relational Database Management Systems such as "MongoDb".

I can make Responsive and Advance Front end Web design using HTML5, CSS3, ES6, AJAX, JQuery and Bootstrap 5

I have experience working with third party API such as twilio, Facebook Meta, Plivo, Nexmo and Easypaisa Payment Gateway.

I also love working in web automation and scraping. I have good experience with Puppeteer and web scraping using node-fetch and cheerio modules.

I have good experience on cloud web applications deployment. I have deployed apps to various popular cloud providers such AWS, Azure and Digital Ocean.

Also, I use Git and GitHub technologies to save code, contribute and work other developers. Moreover, I have hands-on experience with publishing NPM packages.

EXPERIENCE

Freelancing

Work From Home

2021 - 2022 Work from Home

Since last 2 years, I have worked with various foreign and local clients. Some of my work are following:

- I have developed SMS Sale Website for one of my client where he can buy SMS from Twilio or Plivo and sale to users on his website.
- Web scraping bot which make use of puppeteer to scrap data in pdf from a site by automatically filling the form.
- Wedding Plan Management System site in PHP and mysql.
- Whatsapp Bot using official meta APIs and non-official whatsapp api such as whatsapp-web.js and wppconnect.
- A complete Blog Project in Express Js, MongoDB and Bootsrtap for my client.
- I delievered Bus Ticket Management Website to my client.
- A wordpress ECommerce website mehaksonlinestore.com for a shop.
- Web application deployment to Azure and AWS. I have deployed web apps to various Linux Dist. such as Ubuntu, Debian, Fedora. Hands-on experience with Cpanel, Apache and Nginx servers, WAMPP, Nodejs server and Heroku.
